How "usable" was decided: a property counts as usable only if its most recent sale is a genuine, arm's-length market transaction — not a nominal \$0–\$2 transfer between spouses/family, not an estate transmission to heirs, and not a sale old enough (10+ years) to no longer reflect current value. Distance is a straight line from each property's geocoded address to 12 Clark Secor Pl, not the driving or walking route.

On distance: figures come from geocoding each address (OpenStreetMap) and calculating the straight-line distance to 12 Clark Secor Pl — accurate enough to judge which comps are worth using, but not the official Teranet-confirmed distance that would go in a formal report.

On the two closest properties: 268 Ridgewood Rd (70m) and 44 Ravine Park Cres (161m) are effectively next door to the subject, but both changed hands through estate transfers with no market price attached — proximity alone doesn't make a comparable usable.

Duplicates and mislabeled files received during collection have been excluded from this list; each row here reflects one confirmed, unique property.
